"ENCHANTRESS"

Right—AGERATUM "BLUE CAP"

ANTIRRHINUM

(Snapdragon)

One of the most popular of all plants for cutting, attractive beds, and for adding rich and glowing colors to the garden. Continual improvements are being made in this group, most important of which is the rust resistant strain. We list only the newer, improved varieties.

NEW VARIETIES OF RUST-PROOF SNAPDRAGONS

Maximum Rust Resistant

It is a joy to see these plants with their base branching habit, length of spike, extraordinary size of blooms, and their clean, healthy broad foliage free from disease. 2 to 3 feet.

ALASKA. Perfectly formed spikes of large pearl white flowers.

CAMPFIRE. Large flower spikes of luminous scarlet.

CANARY BIRD. Sturdy full spikes of rich clear yellow.

CHRISTMAS CANDLE. A unique Snap. Bright flame color with a throat of waxy cream.

COPPER KING. An art shade of burnished copper and old gold. Under artificial light it gives the coppery-violet sheen of an electric spark.

FAIR LADY. Exceptionally large flowers of clear pink touched on the lip with yellow. Cream white throat.

INDIAN SUMMER. Contains all the glorious scarlet, bronze and golden colors so typical of our Indian Summer.

LOVELINESS. Large attractive flowers of pure soft rose gracefully spaced on long non-lateral stems.

PURPLE KING. Large full spikes of deep garnet overcast with glowing purple.

Any of the above: Pkt. 10c, Tr. Pkt. 25c, $\frac{1}{8}$ oz. 50c.

SELECT MIXED. A balanced mixture of all the colors above and also includes other shades. Pkt. 10c, Tr. Pkt. 25c, $\frac{1}{8}$ oz. 40c.

Your Choice of 5 Packets 40c.

The Certificate of Honor Strain

UNIVERSITY OF CALIFORNIA RUST-PROOF MIXTURE. This is the original strain that won the only Certificate of Honor so far awarded in the All-America Awards. It is the majus grandiflorum type in a wonderful range of colors. 2½ feet. Pkt. 10c, Tr. Pkt. 25c, $\frac{1}{4}$ oz. 50c.

New Dwarf Snaps for the Rockery

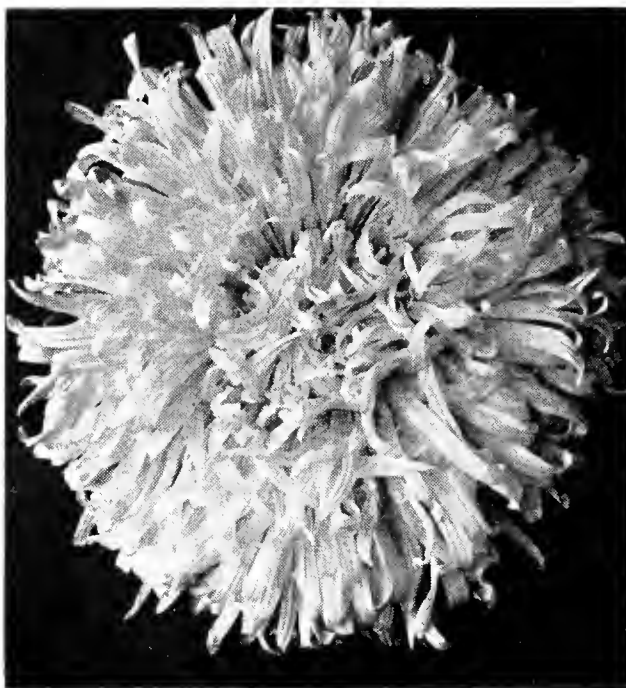

"MAGIC CARPET." A beautiful English novelty of dwarf creeping habit. A variety of soft and pleasing colors. Ideal for the rockery and makes a very acceptable edging plant. Pkt. 20c, Tr. Pkt. 50c.

ANTIRRHINUM

Super Majestic Rust Resistant

This strain with its massive flower spikes is becoming increasingly popular—and now that it is offered in Rust Proof strains it will have a wider usage than ever. The flowers and spikes are equally as large as in the maximum type but they are not as tall, standing about 18 to 24 inches high. You will find that these have strong sturdy stems and will not have to be staked.

AUTUMN GLOW. Beautiful old rose heavily suffused amber with a golden lip. These colors sparkle under an artificial light.

DAINTY. Closely spaced flowers of delightful soft pink. Fine for cutting. An early variety.

HARMONY SHADES. Enormous spikes of terra cotta and yellow overcast with rose. A blending of rich colors.

ORANGE SHADES. Huge spikes of various shades of tangerine, light orange, tinted with gold. Marvelous combinations of rich colors.

RED SHADES. Shades of deep crimson, ruby, and garnet. Glowing colors. Heavy well formed spikes.

ROSE SHADES. The richest and loveliest of Begonia Rose shades. An out-standing variety for cutting.

Any of the above: Pkt. 15c, Tr. Pkt. 40c, $\frac{1}{8}$ oz. 50c, $\frac{1}{4}$ oz. 75c.

SUPER MAJESTIC MIXED. A balanced mixture of all the new varieties, giving a grand selection of colors. Pkt. 10c, Tr. Pkt. 25c, $\frac{1}{8}$ oz. 35c.

A Packet Each of Six Varieties 75c.

ARCTOTIS

GRANDIS (Blue Eyed African Daisy). Pretty daisy-like flowers of pearl white handsomely tinted with mauve. Flowers close at dusk resembling lilac cups. A profuse bloomer. $1\frac{1}{2}$ to 2 feet. Pkt. 10c, Tr. Pkt. 20c, $\frac{1}{4}$ oz. 35c.

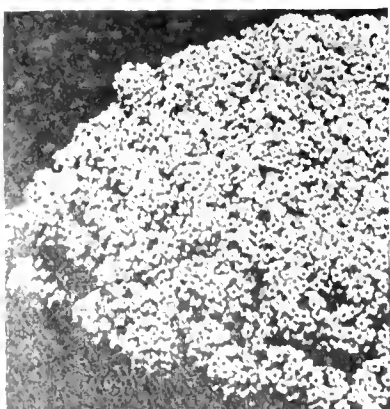

LARGE FLOWERED HYBRIDS. Showy flowers resembling Gerbera in rich shades of apricot, orange, bronze, yellow, pink, and red. Does well in a sunny position. Fine for cutting. 1 foot. Pkt. 15c, Tr. Pkt. 35c, $\frac{1}{8}$ oz. 50c.

ARGEMONE

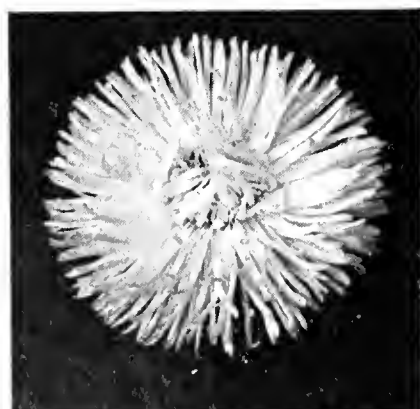

HYBRIDA MIXED (The Prickly Poppy). Spiny glaucous leaves. Silky white flowers with golden yellow anthers. 2 feet. Pkt. 10c, Tr. Pkt. 20c, $\frac{1}{4}$ oz. 30c.

ASTER

Very few annuals can rival the Asters in general usefulness. With the great advances made in improving the types, and breeding in the wilt resistant strain, Asters are again taking the front in popularity.

The Gold Medal Strains of Zinnia

ZINNIA CALIFORNIA GIANTS
The largest of all Zinnias

ZINNIA

Zinnias are in the top rank of garden favorites. They are easy to grow, do well in all soils, and give a lavish display of color even in the hottest driest summers.

Our Zinnia seed is grown by Bodger Seeds, Ltd., of California, the originators of many of these items. They stand supreme in this field. Because of this we confidently recommend these seeds as the finest that can be procured.

Gold Medal Giant Dahlia Flowered

Extra large flowers 4 to 5 inches in diameter held on well-branched, sturdy plants 3 feet high. Because of the perfection of this strain it was awarded a Gold Medal by the Royal Horticultural Society.

PYRETHRUM **Painted Daisies**

One of the most dependable varieties for garden decoration and highly recommended for cut flowers. They come into bloom about Decoration Day and if kept picked will last well into the summer. Easy from seed.

HUNTINGTON'S CHOICE NAMED VARIETIES MIXED. This seed comes from the finest collection of named varieties of Painted Daisies in this country. Our experimental garden contains nearly every variety grown in this country. Such beautiful things such as "Cameo Pink," "Buckeye," "Rose Glory," "Princess Margaret," "Miami Queen," "Ruth Huntington," "Lord Roseberry," "Sylvia" and many others. Most of them are doubles and semi-doubles of perfect form in a complete color range. Being hybrids they will not come true from seed but they will produce the finest double Pyrethrum in existence. Highly recommended. **Pkt. 30c.**

HUNTINGTON'S SELECTED DOUBLES. Taken from our block of 100% doubles in a mixture that ranges from brilliant scarlet, through coral rose to blush. All different types are in this mixture such as the carnation flowered, crested anemone type, and the full close petaled doubles. A superior strain. **Pkt. 20c, Tr. Pkt. 50c, 1/8 oz. 80c.**

HUNTINGTON'S SELECTED SINGLES. While developing our marvelous doubles we have not neglected the grand singles that make such wonderful cut flowers. A blended strain marked for its unusual size. Runs mostly to reds and pinks with a few whites. **Pkt. 10c, Tr. Pkt. 25c, 1/8 oz. 50c.**

ATROSANGUINEUM. A selection of large red and deep rose singles. **Pkt. 10c, Tr. Pkt. 25c, 1/8 oz. 60c.**

ROSEUM. Taken from bright rose, deep pink and shell pink singles. **Pkt. 10c, Tr. Pkt. 25c, 1/8 oz. 60c.**

JAMES KELWAY. An English strain of large flowered crimson singles. Comes remarkably true. **Pkt. 15c, Tr. Pkt. 35c, 1/8 oz. 75c.**

LANGPORT SCARLET. With the exception of "Huntington's Scarlet," the seed of which we are using in our Named Variety Mixed, this is the finest and largest bright scarlet yet produced. A magnificent overcast of bright vermilion with a golden yellow center. **Pkt. 25c, Tr. Pkt. 70c.**

HOW TO GET BEST RESULTS WITH HUNTINGTON'S SEEDS

ADVANTAGES OF GROWING FROM SEEDS—

First, of course, is the economy. You can have the rare and unusual in your garden at a very modest cost. Raising plants from seed is one of the most interesting and fascinating hobbies for the true flower lover. It is a rare delight to see the seeds develop from tiny seedlings into blooming specimens in your garden.

WHEN TO SOW—Unless you have greenhouse facilities or hot beds the best time to sow alpine, perennial, and annual seeds is in April. In our climate we have found the middle of April very satisfactory for outside sowing. The weather is generally cool, the sun not too hot, and there is plenty of moisture.

PREPARATION OF SEED BEDS—Thoroughly spade and rake the beds. Be sure the bed is level or the seed will wash to one corner. It is not necessary to have the seed bed heavily fertilized. Too much fertilizer is injurious to seedlings, with their tender roots.

HOW TO SOW—Sow the seed thinly, especially those items that are not going to be potted or transplanted early. After the seed is sown take a flat board and firm the seed into the soil. Then screen a light covering of loose soil over the seeds taking particular care that the seed is not covered too deep. Then water with a fine spray. Keep them well shaded until they germinate.

SOW FINE SEEDS IN FLATS OR POTS—The fine seeds of both annuals and perennials should be given

special care by sowing in flats or flower pots. In this way you can watch them more carefully and your results will be much more satisfactory.

HOW TO HANDLE SEEDLINGS—Annual seeds germinate in about from three days to two weeks and they are not as difficult to handle as the alpine and perennial seeds which vary from about one week to a month in germinating. Do not water too much but do not let the soil dry out. Gradually give the seedlings a little air but do not let the mid-day sun hit them. If possible we recommend potting all seedlings as it gives them a start and permits transplanting earlier.

SPECIAL INSTRUCTIONS—Do not sow the seed too deep. Be sure your seed beds are well drained. The proper soil for seed beds is a clean rich loam. Do not permit the soil to become crusted. If the seed does not germinate quickly do not become discouraged, for weather conditions vary the length of time for the seed to germinate.

KEEP THIS IN MIND—We have over thirty years of experience in handling fine seeds and we are always ready to be of assistance to you. While the Spring of the year is always our busy season, yet we have made provisions to set aside a portion of each day to answer your inquiries and to be of help to you in your gardening problems. Call upon us at any time and we will gladly cooperate with you.

Remember fresh, high quality seed costs no more than ordinary seed and will give you the finest results.
